Type SM39PWB-CYCZ side-mounted differential pressure sensor

The SM39PWB-CY differential pressure transmitter is used to measure the liquid level, density, pressure, and flow rate of liquid, gas or steam, and then convert it into 4 mA to 20 mADC HART current signal output. It can also communicate with HART handheld terminal for parameter setting, process monitoring, etc.

standard specifications

(Adjust range on standard zero, stainless steel 316L diaphragm, filling liquid is silicone oil)

1 performance requirement

Reference accuracy of scalrange (including linearity, regression, and repeatability from zero):

± 0.0 7 5% If TD> 10 (TD= maximum range / adjusted range) is: ± (0.0075 TD)%

The square root output accuracy is 1.5 times the above linear reference accuracy. The

Quota code	-20℃ to 65℃ for the total effect amount	Quota code	-40℃ to-20℃ and 65℃ to 85℃ total effects
A	±(0.45×TD+0.25)%×Span	A	±(0.45×TD+0.25)%×Span
B	±(0.30×TD+0.20)%×Span	B	±(0.30×TD+0.20)%×Span
C/D/F	±(0.20×TD+0.10)%×Span	C/D/F	±(0.20×TD+0.10)%×Span

Over the scope of influence

±0.075%×Span

Static pressure effect

Quota code	influence quantity
A	±(0.5%Span)/4MPa
B	±(0.3%Span)/16MPa
F/ G/H/I/J	±(0.1%Span)/16MPa

Overpressure effect

Quota code	influence quantity
A	±0.5%×Span/4MPa
B/C/D/E	±0.2%×Span/16MPa
F/ G/H/I/J	±0.1%×Span/16MPa

long term stability

Quota code	influence quantity
A	±0.5%×Span/1 year
B	±0.2%×Span/1 year
F/ G/H/I/J	±0.1%×Span/1 year

Power impact

± 0.001% / 10V (12 to 42 VDC), negligible.

2 functional specification

Range and range

Range / range		kPa
A	range	0～1
	scope	- 3000～ 3000
B	range	1～ 100
	scope	- 1 6 000～ 1 6 000
C	range	100～ 500
	scope	- 1 6 000～ 1 6 000
	rang	500～ 3000

D	e	
	scope	- 1 6 000～ 1 6 000
E	range	30 00～ 4 000
	scope	- 1 6 000～ 1 6 000
F	range	4 0 00～ 10 000
	scope	- 1 6 000～ 1 6 000
G	range	1～ 100
	scope	1 6 000～ 30000
H	range	100～ 500
	scope	1 6 000～ 30000
I	range	500～ 3000
	scope	1 6 000～ 30000
J	range	3000～ 4000
	scope	1 6 000～ 30000

Quantity limit

In the upper and lower limits of the range, can be adjusted.

It is recommended to choose a range code as low as

possible to optimize the performance characteristics.

Zero point setting

The zero and range can be adjusted to any value within the measurement range in the table, as long as the calibration range minimum range

Installation location impact

The change of the installation position in the parallel direction of the membrane will not cause zero drift effect. If the change of the installation position and the membrane is more than 90° , the zero position in the range of <0.4 kPa will occur, which can be adjusted by adjustment. There is no quantitative impact.

output

Second-line system, 4 mA ~ 20 mADC, optional HART output digital communication, optional linear or square root output. Output signal limit: I min=3.9mA, I max=20.5mA

response time

The damping constant of the amplifier component is 0.1s; the sensor time constant is 0.1s~1.6s, depending on the range and the range ratio. The additional adjustable time constant is: 0.1s~60s. The effect on the nonlinear output (e. g., the square root function) depends on that function and can be calculated accordingly.

preheating time

＜15s

ambient temperature

-40℃～85℃

-20℃ ~65℃ with liquid crystal display and fluorine rubber sealing ring

-50℃ ~85℃; with LCD display: -40℃ ~85℃ working pressure

The rated working pressure is divided into: 16MPa, 25MPa and 40MPa three gear static pressure limit

From 3.5kPa absolute pressure to rated pressure, the protection pressure can be 1.5 times the rated pressure and

added to both sides of the transmitter. One-directional overload limit:

Electromagnetic

compatibility (EMC)

3 install

Power supply and load conditions

The power supply voltage is 24V, R

(Us-12V) / I ma x kΩ where I ma x =

2 3 mA

Maximum power supply voltage: 42VDC

Minimum power supply voltage: 12VDC, 15VDC

(backlit liquid crystal display) digital

communication load range: 250 Ω ~600 Ω

Electrical connection

M201.5 cable sealing buckle, the wiring terminal is suitable

for 0.5 m m 2~ 2. 5 m m 2 wire.procedure linkage

The two sides of the process connection flange have NPT 1 / 4 and UNF 7 / 16 " internal threads.

4 Physical specifications

material quality

Measurement membrane box: stainless steel 316L

Membrane: stainless steel 316L,

Harbin alloy C process flange:

stainless steel 304

Nuts and bolts: Stainless

steel (A4) filling fluid:

silicone oil

Seal ring: nitrile rubber (NBR), fluorine rubber (FKM),

polytetrafluoroethylene (PT F E) transmitter shell: aluminum

alloy material, exterior spray epoxy resin

Enclosure sealing ring:

Nitrile rubber (NBR)

nameplate:, stainless steel

304

weight: 3.3kg (without: LCD, mounting bracket, process connection)
